- VS Code, Netbeans, Git, Jira

Operating System

- Windows, Ubuntu

EXPERIENCE

Kadam Technologies Pvt. Ltd.

Sr. Software Developer

August 2018 - PRESENT

- Developed, tested, and maintained efficient code across various software projects.
- Collaborated with teams to identify and resolve software bugs, improving overall performance.
- Integrated third-party programs and upgraded existing software to enhance functionality and user experience.
- Collected user feedback to refine software capacity and usability.
- Managed system testing, validation, and performance optimization processes.
- Provided detailed weekly reports to stakeholders on project milestones and updates.
- Proactively led multiple projects as a **Team Lead**, ensuring smooth coordination and timely delivery.
- Partnered with **Quarks Technosoft Pvt Ltd** to deliver robust solutions for third-party clients.

PROJECTS

Airlinq - *Front End Developer*

Description: Contributed to a multinational organization that collaborates with telecom operators, developing a central repository for data exchange and streamlining processes across multiple software solutions.

Tech Stack: React.js, Kendo.js, AWS, Node.js

Tools: VS Code

Zenkify - *Full Stack Developer*

Description: Developed a holistic therapy booking platform, allowing customers to easily book appointments and courses from multiple experts offering various therapies.

Tech Stack: Next.js, Laravel, Stripe, AWS, MySQL

Tools: VS Code

[**Avtar Insurance**](#) - *Full Stack Developer*

Description: Developed a React-based admin panel for a California-based insurance company, allowing the team to manage customer queries, services, and access past records. Created Laravel REST APIs to handle backend services.

Tech Stack: React, Laravel, MySQL, Google Maps API, Core UI Admin

Tools: VS Code, Windows

[**DeepSell**](#) - *Front End Developer*

Description: Developed a B2B and channel sales strategy tool that processes organizational data from manual inputs, Excel, or PDF, using sales algorithms to provide accurate insights. Created dynamic and conditional Vue components and integrated GraphQL API queries for reactive, data-driven components.

Tech Stack: Vue.js, Nuxt, GraphQL API, Node.js

Tools: VS Code, Windows

[**HT-Adworks**](#) - *Front End Developer*

Description: Developed a portal for Hindustan Times, allowing third-party agencies, companies, and individuals to book advertisements across platforms like radio, TV, websites, and newspapers.

Tech Stack: Angular, TypeScript, jQuery, Node.js, REST API, Bootstrap

Tools: VS Code, Windows

[**HT-FabPlay**](#) - *JS Developer*

Description: Developed a cross-platform music player application for Hindustan Times using Electron.js, providing subscription-based services to vendors for customer engagement during campaigns, festivals, and specific time periods.

Tech Stack: Angular 4, Electron.js, Bootstrap

Tools: VS Code, Windows, Mac OS

[**EnekLuso**](#) - *Js Developer*

Description: Developed an eyeglasses eCommerce platform using Bagisto (Laravel) and Vue.js, creating custom Vue components for the front-end to enhance user experience in selecting eyeglasses, sunglasses, and powered glasses.

Tech Stack: Bagisto (Laravel), Vue.js, jQuery, Bootstrap

Tools: VS Code, Windows

[**Houseoftempus**](#) - *Back End Developer*

Description: Developed a jewelry e-commerce platform using Bagisto (Laravel), integrating a custom UI and enhancing backend admin features with Vue.js.

Tech Stack: Bagisto (Laravel), Vue.js, MySQL, jQuery, Bootstrap

Tools: VS Code, Windows

Laravel CMS - *Back End Developer*

Description: Built a CMS to streamline website content and design management, reducing developer and designer effort for updates and minor changes.

Tech Stack: Laravel, MySQL, jQuery, Bootstrap

Tools: VS Code, Windows

Car Plate - *Back End Developer*

Description: Developed a Malaysia-based platform for administrators to list license plates for sale. Clients can search and purchase plates, with the system tracking payments and plate records.

Tech Stack: Laravel, MySQL, jQuery, Bootstrap

Tools: VS Code, Windows

BMTool - *Back End Developer*

Description: Developed a financial tool for multi-sector industries to analyze 2-5 years of financial data and generate PDF reports with graphical insights.

Tech Stack: Laravel, MySQL, jQuery, Bootstrap

Tools: PayPal Integration, NetBeans, Windows

[**PrepaidMall**](#) - *Back End Developer*

Description: Developed a web platform for mobile top-up services using Ding.com API, enabling recharges across multiple countries and mobile networks. Integrated Stripe for payment processing.

Tech Stack: Yii, MySQL, jQuery, Bootstrap

Tools: PayPal, Stripe, Ding API, NetBeans, Windows

[AllAboutCity](#) *- Back End Developer*

Description: Developed a business directory tool to find local shops, services, business info, offers, events, jobs, and properties. Optimized search algorithms in MySQL for fast and efficient results.

Tech Stack: CakePHP, MySQL, jQuery, Bootstrap

Tools: NetBeans, Windows

STC Inventory *- Back End Developer*

Description: Developed software to manage inventory, including item stock, supplier purchases, cold storage transfers, billing, invoicing, and activity logging.

Tech Stack: Laravel, MySQL, jQuery, Bootstrap

Tools: VS Code, Windows

[Zevsoft](#) *- Back End Developer*

Description: Developed paving estimation software to calculate construction area, material costs, and manpower for paving and construction projects.

Tech Stack: Laravel, MySQL, Google Maps API, jQuery, Bootstrap

Tools: NetBeans, Windows

[Food Inventory](#) *- Back End Developer*

Description: Developed inventory management software for a Malaysian organization, managing recipe creation, order processing, and food items & ingredients inventory.

Tech Stack: Laravel, MySQL, jQuery, Bootstrap

Tools: NetBeans, Windows

[DoubtNut](#) *- Backend Developer*

Description: Developed a backend panel in Core PHP for Doubtnut, integrating with SuiteCRM to manage agent responses, lead data, and employee information for the management team.

Tech Stack: Core PHP, MySQL, SuiteCRM API, Bootstrap

Tools: VS Code, Windows
